

Chemical Peel Aftercare

- Do not wash the treated area for at least 4 hours after the treatment
- Avoid sun exposure for at least 7 days
- Do not use Retin-A, Retinol or active acne ingredients (Benzoyl peroxide, Salicylic acid or Glycolic acid) products for 7 days
- Wear sunscreen every day (SPF30+)
- Apply moisturizer as needed for dryness
 - Cetaphil, CeraVe, La Roche Posay, Neutrogena Hydro Boost
- Do not pick or peel the treated area
- It is normal to have redness, swelling and possible peeling for up to 2 weeks, which will transition into a darkening and peeling of the skin
